

**CLEANLINESS** is necessarily at all times conducted to health, and thus, as well as economy, is greatly promoted by substituting for the noxious process of painting with oil, the use of the DYE, which is a preparation of **WOOD, as a SUBSTITUTE for PAINT**, for decorating churches, large public rooms, and theatres, as well as private dwellings. When economy in expenditure of material and time is of importance, these Dyes will be found of the greatest advantage, as they give a rich and brilliant colour, which is not so liable to fade as the natural graining, which is so susceptible to imitations by art, and, at the same time, avoid the disagreeable smell attendant on the application of paint. The Dyes, or Stains, are prepared and sold by **HENRY STEPHENS, 41, Stamford Street, Blackfriars-road, London**, in bottles at 1s. 6d. in each, and at 10s. in the gallon. The Oak, Mahogany, and Main Wood Colours may be obtained in powder at 2s. per lb., which dissolve in water for use; the Liquid, and 1 lb. will make one gallon of stain—8s. The trade supplied.—Sold also at the Office of "The Builder," 4, York Street, Covent Garden, London; at both which places may be had the
